

Great Western coach numbers

The list shows the running numbers of Great Western coaches built from about 1890 to 1954 (lot 1777 was the last Great Western design) plus some vehicles prior to 1890, with the relevant building lot and diagram numbers. This should make it easier to identify a coach from its number by then using one of the books listed below. Lists are also given for steam railmotors, auto trailers and diesel railcars, all of which had separate series, as well as the Vale of Rheidol narrow gauge stock.

Originally coaches were numbered in separate series for first, second, third class etc. but in 1907 they were renumbered, with Second Class having 5000 added, composites 6000 and First Class 8000. Various other types were completely changed, particularly saloons, sleepers and dining cars which were put into the 9xxx series. The numbers listed are those carried from 1907 with pre-1907 numbers (if any) also shown, for example (6)601 is a compo which used to be number 601. With Second Class being abolished in 1910, some coaches carried three different numbers in a short space of time. If the same number was carried by more than one coach these are shown next to each other.

A rough guide to building dates can be taken from

Lot 927 (early 1900), 1167 (1910), 1261 (1920), 1405 (1930), 1621 (1940) and 1726 (1950)

Coach Diagram letters:

A (first class), B (second class), C (third class), D (brake third), E (composite or brake composite), F (slip), G (saloon), H (catering), J (sleeper), K (passenger brake), L (mail), Q (inspection vehicle).

4- and 6-wheel vehicles used these letters: R (first class), S (third or ex second class), T (brake third or ex brake second), U (composite or brake composite), V (passenger brake), W (parcels or misc).
